- (a) defines, for the purposes of this provision, the terms set forth below as follows:
    - (i) “Corrupt practice”<sup>2</sup> is the offering, giving, receiving or soliciting, directly or indirectly, of anything of value<sup>3</sup> to influence improperly the actions of another party;
    - (ii) “Fraudulent practice”<sup>4</sup> is any intentional act or omission, including a misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain a financial or other benefit or to avoid an obligation;
    - (iii) “Collusive practice”<sup>5</sup> is an arrangement between two or more parties designed to achieve an improper purpose, including to influence improperly the actions of another party;
    - (iv) “Coercive practice”<sup>6</sup> is impairing or harming, or threatening to impair or harm,

<sup>1</sup> In this context, any action taken by a Bidder, Supplier, Contractor or a Subcontractor to influence the procurement process or contract execution for undue advantage is improper.

<sup>2</sup> “another party” refers to a public official acting in relation to the procurement process or contract execution. In this context, “public official” includes staff and employees of any organizations (including any institutions providing finance for the Goods) taking or reviewing procurement decisions.

<sup>3</sup> “anything of value” includes, but is not limited to, any gift, loan, fee, commission, valuable security or other asset or interest in an asset; any office, employment or contract; any payment, discharge or liquidation of any loan, obligation or other liability whatsoever, whether in whole or in part; any other services, favour or advantage, including protection from any penalty or disability incurred or apprehended or from any action or proceeding of a disciplinary or penal nature, whether or not already instituted and including the exercise or the forbearance from the exercise of any right or any official power or duty.

(v) "Obstructive practice" is

(aa) deliberately destroying, falsifying, altering or concealing of evidence material to the investigation or making false statements to investigators in order materially to impede any investigation into allegations of a corrupt, fraudulent, coercive or collusive practice; and/or threatening, harassing or intimidating any party to prevent it from disclosing its knowledge of matters relevant to the investigation or from pursuing the investigation; or

(bb) acts intended materially to impede the exercise of the inspection and audit rights of the Purchaser or any organization or person appointed by the Purchaser and/or any relevant RGoB agency provided for under ITB Sub-Clause 2.1 (d) below.

(c) will sanction a firm or individual, including declaring them ineligible, either indefinitely or for a stated period of time, to be awarded an RGoB-financed contract if it at any time determines that they have, directly or through an agent, engaged in corrupt, fraudulent, collusive, coercive or obstructive practices in competing for, or in executing, an RGoB-financed contract;

(d) will have the right to require that a provision be included in Bidding Documents and in contracts financed by the RGoB, requiring Bidders, Suppliers, Contractors and their Subcontractors to permit the Purchaser, any organization or person appointed by the Purchaser and/or any relevant RGoB agency to inspect their accounts and records and other documents relating to their Bid submission and contract performance and to have them audited by auditors appointed by the Purchaser;

3. Multiple Contracts (ITB Sub-Clause 39.6)
4. Post qualification Requirements (ITB Sub-Clause 41.2)

**1. Domestic Preference (ITB 38)**

- 1.1 If the Bidding Data Sheet (BDS) so specifies, the purchaser may grant a margin of preference to goods manufactured in the Purchaser's country for the purpose of bid comparison, in accordance with the procedure outlined in subsequent paragraphs:
- 1.2 Bids will be classified in one of the three groups, as follows:
- a) Group A: Bids offering goods manufactured in Bhutan, for which (i) labor, raw materials and components form within the country account for more than thirty (30) percent of the EXW price; and (ii) the production facility in which they will be manufactured or assembled has been engaged in manufacturing or assembling such goods at least since the date of bid submission.

### 3. Technical Specifications

#### 1. Definitions

Print Management System is an integration solution that consists of hardware and software to control people from misusing printers and to save the printing resources. It is a comprehensive system designed to flawlessly monitor and control resources. The system is design to reduce the cost by providing permission to print certain number of pages and to maintain a log of all events by the users.

The requirements may change over time. The Printer Management System should be designed for adapting these changes. It should provide flexibility, scalability and can be configured to meet college's needs now and in the future.

#### 2. Rationale

Currently the College has invested in heavy and expensive printers. The printers are not centrally managed. Staffs mismanage the printers and students do not have access to printings. Lot of papers are wasted and the College spent huge amount on maintenance of these printers. College feels the requirement of central monitoring and managing of all the network printers for better management of printing resources.

The key benefits of the system are:

1. Transfers accountability to users or departments by individually tracking activity.
2. Creates environmental awareness by drawing users' attention to the impact of their specific usage.
3. Reduces overall printing cost through job filtering, enforcing flexible quotas, or direct cost recovery.
4. Discourages over use of IT resources by establishing a managed print environment.
5. Improves efficiency by allowing administrators to create rules that can steer printing to designated printers for load balancing, to implement Find-Me printing, or to redirect print jobs based on criteria defined using advanced scripting tools.
6. Improves network reliability by implementing rules to prevent printer queue jams, queue hogging, and inappropriate printing types.
7. Protect intellectual property and conform to audit.
8. Objectives by enabling features such as print auditing and digital signatures.

#### 3. Scope

The print management system should be able to support large printers with about 1500 users. User should be able to configure system as per their needs such as simple monitoring and reporting, should include pricing, blocking filters and programmatic control via API and scripting. It should be simple and easy to implement within a few minutes with option to adjust parameters gradually or quickly as user wants.

- The print management system shall manage all the networked printers, Multi-functions Printers (MFP) and heavy duty printers.
- The Print Management Software shall be integrated with Users Directory Services such as Active Directory service or LDAP to accommodate various user/group profiles
- The system shall be able to set print quota for all the users on semester basis (6 Monthly-basis) and charge per-print

- End-users shall be able to buy print credit and top-up once their quota is exhausted.
- The system shall be able to perform active monitoring and generate all kinds of report

#### 4. Components of print management system

##### 4.1 Software:

- Used to adjust all parameters of the system, control hardware, display events related to printer user such as users' name, print quota, number of pages printed. The software is also used for storing all events in the database and generating reports based on requirements defined by an operator.

##### 4.2 Hardware:

Print server is a device that connects printers to client computers over a network which accepts print jobs from the computers and sends the jobs to the appropriate printers, queue the jobs locally to accommodate the fact that work may arrive more quickly than the printer can actually handle.

##### 4.3 Wooden Frame:

The wooden frame protect printer from mishandling and stop end-users from pulling the paper tray of the printers. Users will be allowed only to print and collect the printed copies.

#### 5. Topology of the Printer Management System

#### 6. Wooden Frame Specifications:

## 7. Technical Detail

### Software and Hardware Detailing

#### Software

Software should be network based application. It should have easy administrative and user tools that can be securely accessed from anywhere on the network through a web browser. The software should be capable of:

- Tracking all printing activity by user, client account, printer and document metadata.
- Enforce per user quotas, or group account budgets
- Differential print cost/charging allowing costs to be assigned on a per printer basis with advanced options to charge different amounts based on document type (e.g. color, gray scale or duplex), page size, user or group.
- Hardware neutral solution supports all major printer types and operating systems. No hardware vendor lock-in.
- Both cross-platform and multi-platform support. Run a mix of Windows and/or Linux print servers and support clients ranging from Windows, Mac and Linux.
- User Web Tools allow end users to track usage, request refunds and upload documents from unauthenticated (wireless) laptops.
- Single sign-on user authentication with native Active Directory integration or synchronization with LDAP user accounts. (no separate passwords to manage)
- Flexible hold/release queue support with Release Station software allowing administrators to implement management approved or secure user release printing environments.
- Service Oriented Architecture utilizing the latest software design methods including, test driven development, XML Web Services and layered architecture. This ensures scalability and stability by design.
- Advanced reporting and charts available in standard formats including PDF, Excel, and HTML. All reports accessible from anywhere on the network via a standard web browser.
- Ability to run on top of leading 3rd party Relational Database Management Systems (RDBMS) including Microsoft SQL Server, Oracle, MySQL and PostgreSQL Database.

- Enterprise level security and encryption based on SSL.
- Open architecture with a powerful scripting language, source code access and API documentation

### Attachment: Price Adjustment Formula

If, in accordance with GCC 16.2, prices shall be adjustable, the following method shall be used to calculate the price adjustment:

- 16.2 Prices payable to the Supplier, as stated in the Contract, shall be subject to adjustment during performance of the Contract to reflect changes in the cost of labor and material components in accordance with the formula:

$$P_1 = P_0 \left[ a + \frac{bL_1}{L_0} + \frac{cM_1}{M_0} \right] - P_0$$

$$a+b+c = 1$$

in which:

- $P_1$  = adjustment amount payable to the Supplier.
- $P_0$  = Contract Price (base price).
- $a$  = fixed element representing profits and overheads included in the Contract Price and generally in the range of five (5) to fifteen percent (15%).
- $b$  = estimated percentage of labor component in the Contract Price.
- $c$  = estimated percentage of material component in the Contract Price.
- $L_0, L_1$  = labor indices applicable to the appropriate industry in the country of origin on the base date and date for adjustment, respectively.
- $M_0, M_1$  = material indices for the major raw material on the base date and date for adjustment, respectively, in the country of origin.

The coefficients  $a$ ,  $b$ , and  $c$  as specified by the Purchaser are as follows:

$a = [\text{insert value of coefficient}]$

$b = [\text{insert value of coefficient}]$

$c = [\text{insert value of coefficient}]$

The Bidder shall indicate the source of the indices and the base date indices in its bid.

Base date = thirty (30) days prior to the deadline for submission of the bids.

Date of adjustment =  $[\text{insert number of weeks}]$  weeks prior to date of shipment (representing the mid-point of the period of manufacture).

The above price adjustment formula shall be invoked by either party subject to the following further conditions:

- (a) No price adjustment shall be allowed beyond the original delivery dates unless specifically stated in the extension letter. As a rule, no price adjustment shall be allowed for periods of delay for which the Supplier is entirely responsible. The Purchaser will, however, be entitled to any decrease in the prices of the Goods and Services subject to adjustment.

- (b) If the currency in which the Contract Price  $P_0$  is expressed is different from the currency of origin of the labor and material indices, a correction factor will be applied to avoid incorrect adjustments of the Contract Price. The correction factor shall correspond to the ratio of exchange rates between the two currencies on the base date and the date for adjustment as defined above.
- (c) No price adjustment shall be payable on the portion of the Contract Price paid to the Supplier as advance payment.
